

# MongoDB Atlas Usage Document

Step 1. Create your MongoDB Atlas account and Login into it.

Step 2. Create a new Cluster by following the instruction given in the image below:

Step 3. From **Cloud Provider & Region** section choose any one cloud service (AWS, Google Cloud, Azure). After that select any region labelled with **Free Tier Available**. Then from **Cluster Tier** section choose **M0** cluster (which is free). And then click on **create cluster** button below.

Step 4. Now to add your IP address to whitelist so that you can access your database follow the steps shown below:

RUNALIS DRG - 2018-04-11 &gt; PROJECT 0

[Build a New Cluster](#) Docs

Enterprise Security

[+ ADD NEW USER](#)

User Name	Authentication Method	MongoDB Roles	Actions
K_Vaid	SCRAM	atlasAdmin@admin	<a href="#">EDIT</a> <a href="#">DELETE</a>
mongodb-stitch-demo_app-bqxeq-mongodb-atlas	SCRAM	readWriteAnyDatabase@admin	<a href="#">EDIT</a> <a href="#">DELETE</a>

[Build a New Cluster](#) Support

Enterprise Security

+ ADD IP ADDRESS

You will only be able to connect to your cluster from the following list of IP Addresses

IP Address	Comment	Status	Actions
54.76.145.131/32	For MongoDB Stitch; do not delete	<span>●</span> Active	<a href="#">EDIT</a> <a href="#">DELETE</a>
157.47.185.159/32	My iPhone	<span>●</span> Active	<a href="#">EDIT</a> <a href="#">DELETE</a>

## ers

1.

ALLOW ACCESS FROM ANYWHERE

0.0.0.0/0

Temporary IP for fixed duration

3.

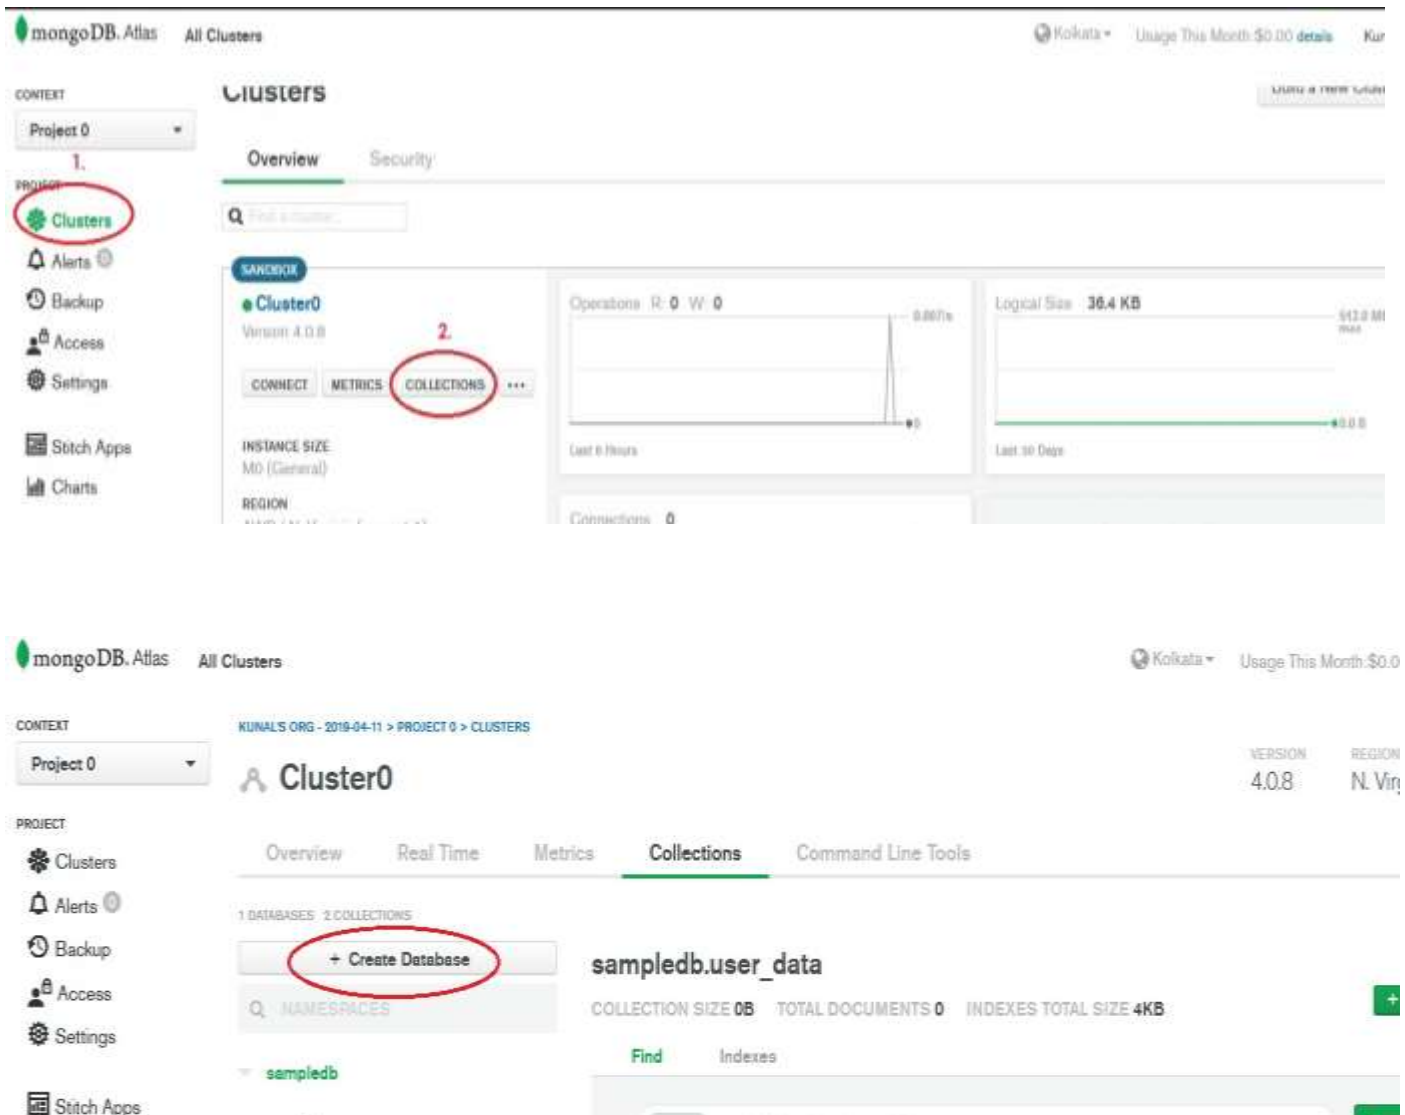

Cancel

Confirm

For MongoDB Stitch; do not delete

● Active

Step 5. Now after adding IP to whitelist, follow the instructions in image below to create a database.

Now give name to your database and collection and press create button.

Step 6. Follow the below instructions on how to connect with your database:

Last 30 Days

### Connect to Cluster0

✓ Setup connection security

Choose a connection method

Connect

Choose a connection method [View documentation](#)

See methods to add data and diagnostics in the [Command Line Tools](#) shortcut from within your cluster.

Connect with the Mongo Shell

Mongo Shell with TLS/SSL support is required

Connect Your Application

Get a connection string and view driver connection examples

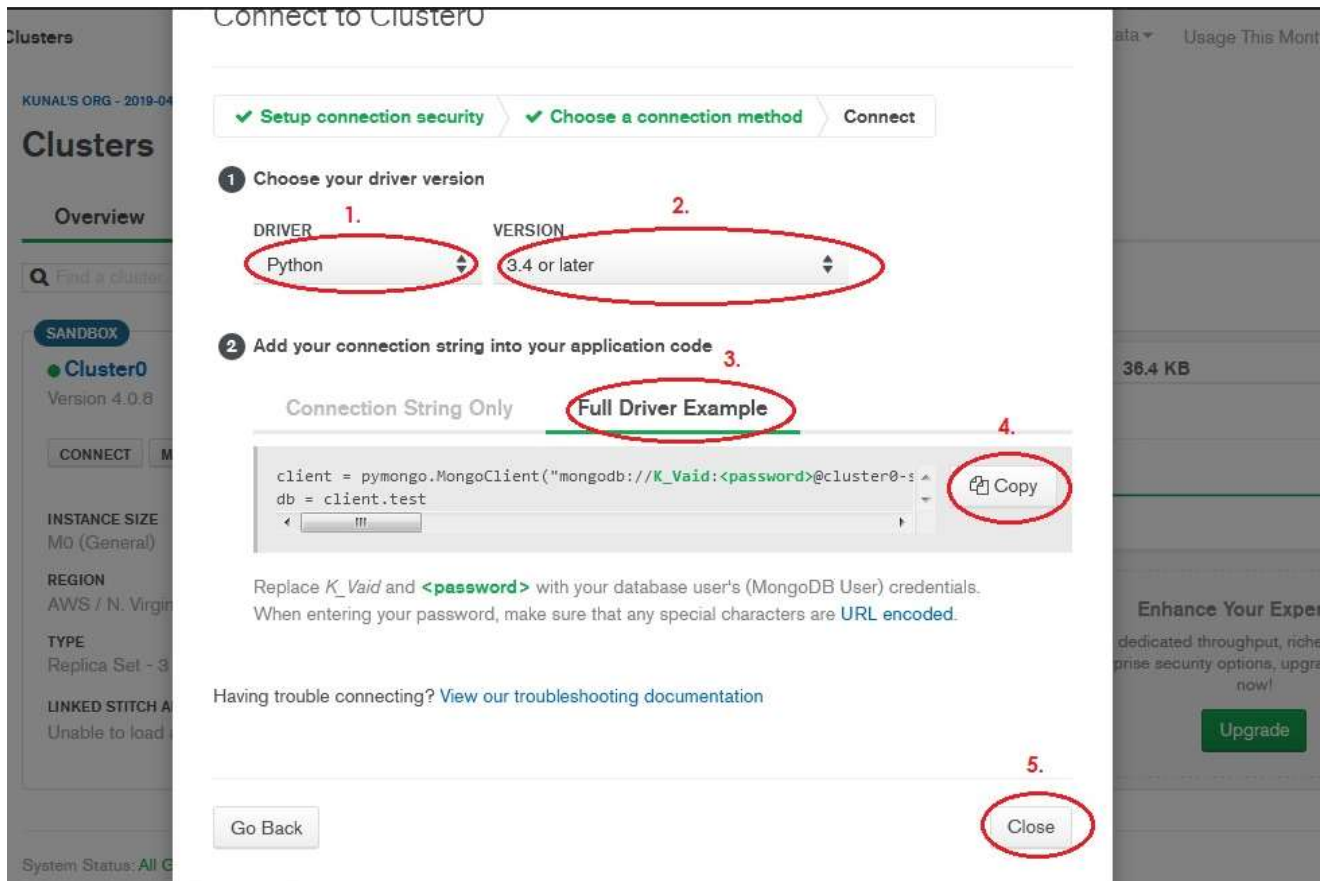

Connect with MongoDB Compass

Download Compass to explore, visualize, and manipulate your data

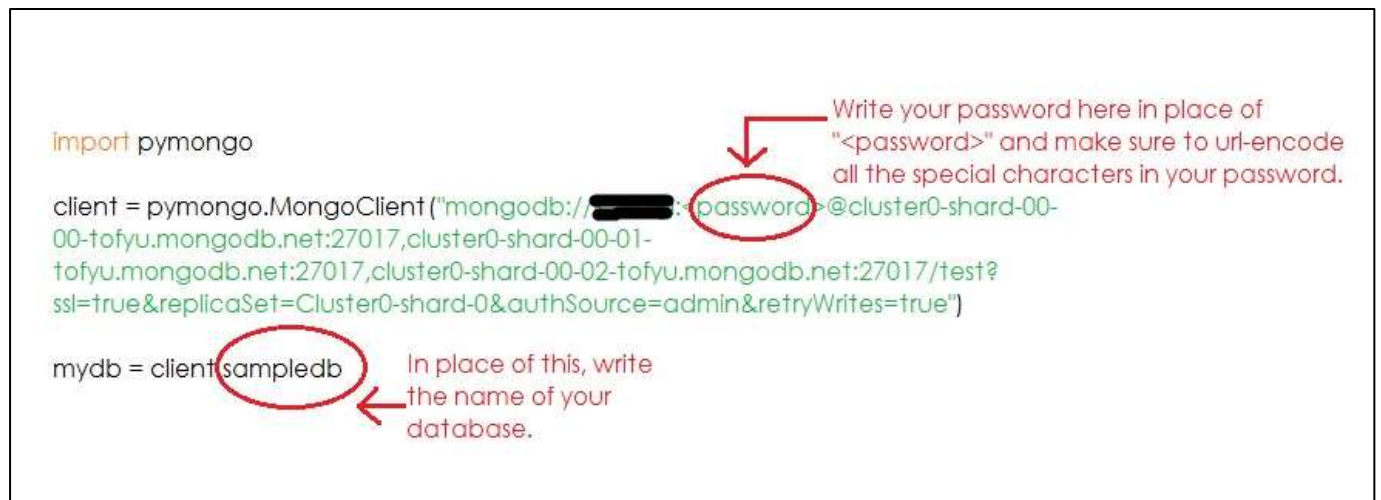

Go Back

Close

Step 7. Now paste your copied string in your python code and follow the below lines of code for the setup:
